4.0 out of 5 stars Great Book!, May 22, 2008

I'm in 7th grade and read this book for a book report. I liked how I felt like I was really there in the story experiencing the action. Without giving anything away, I do wish some of the loose ends could have been "tied up" at the conclusion but it was a good, suspenseful book and I liked it alot.

Just had Byron in our store for a guest author signing and both he and the book were a hit! Speed Kills is a slam dunk for preteen boys who want to be a hero someday. Would not surprise me at all if it ends up inspiring some young readers to go into law enforcement. A couple understandable lapses from reality to make it fit the preteen market (no cursing and a couple superhuman moves), but overall a great read. Action packed. Perfect for a preteen to read on their own or for you to read with a younger child.

Need a gift for a graduate? Perfect Choice. Need Adventure? Stop here and buy. This book appeals to a wide range of readers, a common issue we all deal with on a daily basis. The author has professional experience with his subject matter and presents an issue we all are often concerned with. I found intelligence, warmth, wit and practical applications that will provoke the reader to take the words with you when you close the last page of the book. Cecilia
